

BONDING POWDER PAINTS

A world of color and glitter powder coatings

- Wide range of colors, design and styling effects
- Cost-effective and readily available
- Quality products from a single source

PREMIUM & RECYCLABLE

The refined powder coatings by Wörwag are very versatile. In a high-tech bonding process, effect pigments are firmly bound to the powder particles by a thermo-mechanical method. This process helps to ensure high process reliability during application and makes almost 100 percent recovery of materials possible.

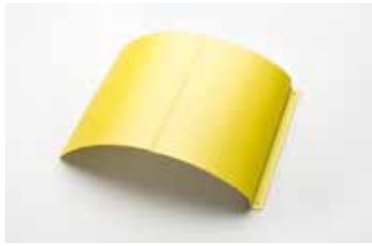

FREEDOM FOR DESIGNERS

The wide variety of effects, such as pearlescent pigments, aluminum pigments and crystal effect pigments give designers unlimited freedom. Our coating engineers produce a wide range of trendy colors and also make individual custom colors and effects to order.

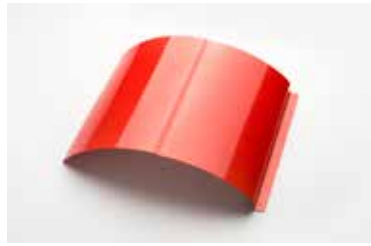

ALL IN ONE

With the newly introduced method, customers can have the base material and effect powder coating from a single source.

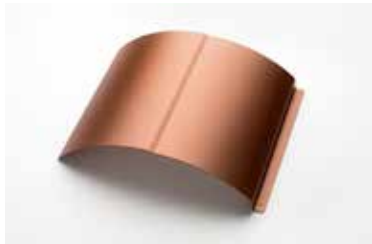

Yellow Dioxide

Pink Flamenco

Wulfen Chrome

Dark Cuprum

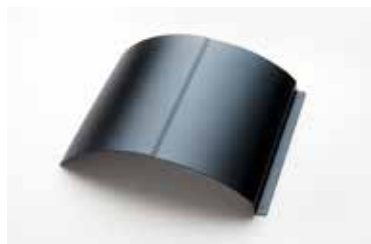

Indian Gold

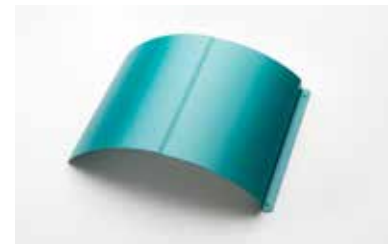

Bamboo Tech

Potent Purple

Scratch
