

# We combine excellent protection with first-class appearance

- very good chemical resistance
- very good light and weather resistance
- good mechanical and scratch resistance
- excellent optical properties

## A DESIGN CLASSIC

We combine the best possible protection with an excellent appearance. This is also the case with Industriq Powder Topcoat W852. The polyurethane powder coating impresses with excellent functional properties and its outstanding appearance: perfect leveling, brilliant colors and effects, whether matt or high-gloss. A powder coating giving surfaces character. With this profile and the furniture from USM Haller, Industriq Powder Topcoat W852 has already made it into the Museum of Modern Art as a design classic.

## STRONG PROTECTION FOR DURABLE SURFACES

Industriq Powder Topcoat W852 wraps itself like a protective shield around components of all kinds. It gives surface damage or color deviations no chance: neither from harsh chemicals and cleaners nor from sunlight or other weather influences. Even sharp objects or friction cannot harm the paint - strong protection for long-lasting and visually high-quality surfaces.
