

# We don't give chemicals and the weather any chance

- excellent chemical resistance
- suitable for outdoor use
- free of fission products and degassing
- reproduction of a wide variety of surfaces possible

Industriq Powder Topcoat W851 is a proper protective shield against many chemicals, whether acids, alkalis, solvents, hot animal and vegetable greases or aggressive chemicals. Even graffiti and the sharpest graffiti cleaners don't stand a chance. The hybrid powder coating with cross-linking protects surfaces and does not allow any damage to the layer.

In addition to interior applications, the powder coating system is also suitable for exterior applications and scores with good weather resistance. Industriq Powder Topcoat W851 also offers advantages in the painting process: Neither fission products are released, nor do degassing difficulties occur. Depending on the area of application, a wide variety of surfaces can be reproduced.
